**Ringworm (Dermatophytosis) Almost Gone in 5 days,  
"Anonymous Doctor", That a very fast ringworm response by any standard."**

What Is Ringworm (Dermatophytosis)? Dermatophytosis, more commonly known as ringworm, is a fungal infection of the skin. Ringworm is a misnomer. The infection isn't caused by a worm. It's caused by a fungus. Ringworm infection can affect both humans and animals. The infection initially presents itself with red patches on affected areas of the skin and later spreads to other parts of the body. The infection may affect the skin of the scalp, feet, groin, beard, or other areas.

You can see day 1 8-31-2016 untreated and at day 3 treated vastly improved. I expect day 5 to see no more signs of Ringworm! This is only a few days but you can see the ringworm going away. Let me find some text on each photo. This is not my first case of Ringworm being solved. So I asked you why are you interested as the FDA or Dermatologist would never allow this product for sale. Today Dermatology is a \$10 Billion Dollar industry composed of 10,000 Dermatologist in the USA and 25,000 staff. Now for some pictures and more to come!

8-31-2016 Don So, my son got ringworm, of course, as soon as school starts, and with all those germs. But, I took a picture of it and put some Pico Skin Relief on it. Its only been two days, but I'm trying an experiment! on my child!, Dear Lord! But it looks better in one day. Ringworm Day 1 Untreatd.jpg

I have all the pictures i can share with you, I will send you the final pictures in a few days. I used the same dilution as for the household cleaner for two days and it didn't make much difference, So i tried a bit stronger 4oz to a gallon. Three times a day and covered with a bandage. It's all just about gone now. I bet that is why it took longer. As I believe the initial dilution wasn't strong enough where I had just winged it.

I would spray it on him when he would complain that it was itchy, and it definitely stopped his pain and itching. Thank you Pico Skin Relief!

9-1-2016 I will keep you posted. It's almost all clear now. This was yesterday. It really

works. I was a bit hesitant in the process, but its a miracle soap.

I will send you more pictures in 2 days as I believe it will be all gone than! Pico Skin

Relief is a miracle

9-3-2016 I As promised day for in the morning mother reported son all fine and slight

sign of Ringworm!

9-5-2016 Here is the last photo no ringworm visible and the mother is very happy!
